

Customer Information on the EU Packaging and Packaging Waste Regulation

Dear Sir or Madam,

As your reliable partner, we would like to provide you with clarity and assurance regarding the requirements of the European Packaging and Packaging Waste Regulation.

We hereby confirm that we comply with the **applicable requirements of Regulation (EU) 2025/40 (PPWR)** for the packaging used in our deliveries, taking into account the legally defined application dates and transitional periods.

Our Responsibility

For packaging for which we act as the producer, we have completed the prescribed conformity assessment procedures.

The relevant **EU Declarations of Conformity and technical documentation are available** and are maintained in accordance with the applicable legal requirements for presentation to the competent authorities.

For packaging supplied by our suppliers as the producers, we also have the information and documentation required to fulfil our verification and due diligence obligations. In this way, we take into account both our own packaging and the packaging used for the products we distribute.

Central Access to Legally Required Information

We have **labelled our shipping cartons and delivery notes with a QR code** that links directly to our sustainability page. All legally required information relating to our packaging is compiled there in one central location.

Further Developments

We continue to monitor developments under the Regulation and will adapt our processes in good time to ensure compliance with any future requirements within the applicable statutory deadlines.

If you have any questions regarding our packaging or the related documentation, please contact your usual contact at esco, who will be happy to assist you.

Thank you for placing your trust in us. We look forward to continuing our successful partnership.

Kind regards
esco Metallbausysteme GmbH

Florian Vogel
Sales Director
